Curtain MonGuard

Prevent data leaks caused by unauthorized screen sharing or recordings

Solution overview

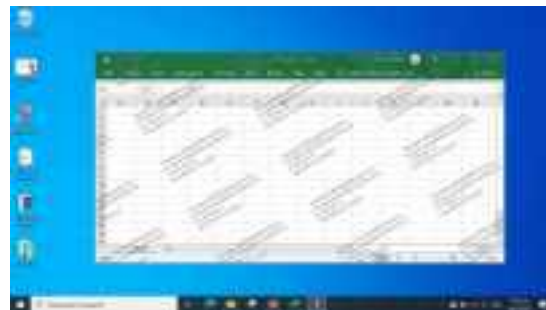

Curtain MonGuard is a powerful tool for enhancing data security by preventing unauthorized screen captures. With the rise of remote work, protecting sensitive information is crucial. Curtain MonGuard protects against unauthorized sharing by adding visible watermarks with user information to the screen. These watermarks appear in full-screen mode or specific applications. Supporting over 500 applications and allowing customizable watermark content, it helps trace potential data leaks, adding an extra layer of security for organizations.

Features

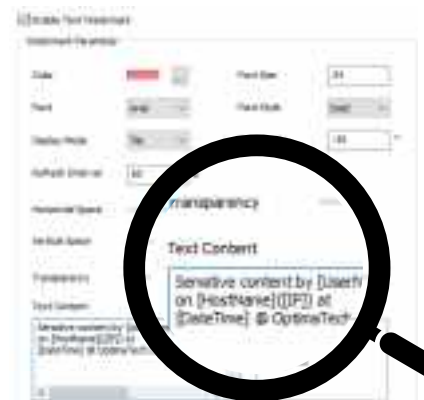

Full-Screen Watermark

On-screen watermark for comprehensive data protection.

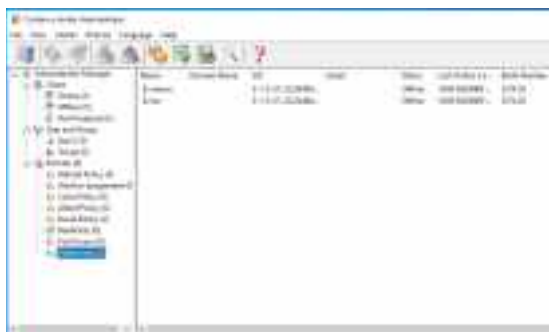

Application Watermark

Application-specific watermark to control sensitive workflows.

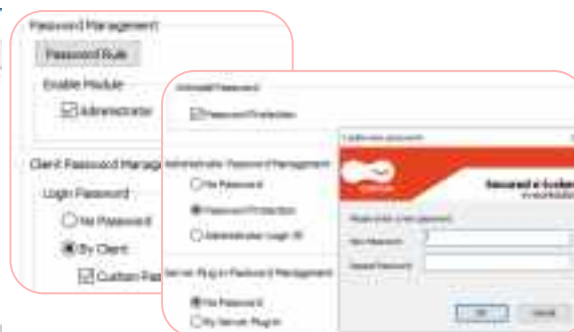

Customized Content

Custom watermark content like usernames, timestamps, or IP addresses.

Unified Management

Centralized management console for policy configuration and monitoring.

Password Management

Password-protected uninstallation for extra security.

LDAP

Flexible Deployment

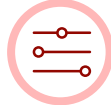

LDAP and Active Directory integration for seamless deployment and configurations.

Benefits

Enhanced Security

Prevent unauthorized screenshots, ensuring your data remains confidential.

Customizable Protection

Tailor watermarks based on your organization's security policies and user roles.

Compliance Support

Meet regulatory requirements by ensuring sensitive information is always marked and protected.

Centralized Control

Simplify management with centralized administration, allowing easy policy updates and monitoring.

Increased Accountability

Track and deter potential data leaks by embedding user-specific information within the watermark.

Scalability

Supports a wide range of applications and users, making it suitable for organizations of all sizes.

Use Cases

Internal Compliance Audits

Ensure audit transparency by using watermarks to track and log access to sensitive financial, legal, or regulatory documents.

CCTV Footage Protection

Safeguard recorded video from unauthorized screen captures during playback.

Training and Presentations

Secure proprietary content during internal training sessions or external presentations.

Social Media Protection

Deter social media sharing attempts by embedding identifiable watermarks that link activity to specific users.

Confidential Document Review

Apply watermarks during sensitive document reviews to prevent unauthorized sharing of confidential data.

Reference Industries

Finance

Protect financial data during internal reviews and client meetings with visible, customizable watermarks.

Healthcare

Ensure patient confidentiality by applying watermarks on health records and telemedicine platforms.

Legal

Safeguard case files and sensitive documents during internal or client sharing.

Education

Protect research data and intellectual property during online lectures and collaboration.

Government

Protect classified documents and inter-departmental communications with traceable watermarks.

Consulting

Secure proprietary client information during reviews and presentations.
